-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 November 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

1. Claims 9-12 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot refer back to another multiple dependent claim. See MPEP § 608.01(n).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Cuzzo et al.

Cuzzo et al. teach an image forming apparatus (printer) which manages a consumable (toner) and generates a consumption ratio between a count value of the product (copy sheet) to be generated based on image data and a pixel value (data quantity) count value. See col.3, lines 1-41.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 13,16,18,20,22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cuzzo et al. in view of Maruta et al.

Cuzzo et al. taught supra discloses most of what is claimed except the printer being on a network and communicating with a management terminal wherein the printer sends the counted sheet value and pixel count value to the management terminal which in turn calculates the consumption rate. Maruta et al. teach a printers 3a, 3b located on a network and which are managed by a center side data processor. With regard to Figs 21-22, print information (number of prints, color, picture quality, etc) from a user side processor which is adjacent the printers is sent to the center side data processor (remote location) which calculates a value (such as cost). It would have been obvious to one of ordinary skill in the art at the time the invention was made locate the printer on a network and send data to a central remote processing station because only one calculation unit for a plurality of printers would be needed which saves cost.

4. Claims 1, 3-12,15,17,19,21,23 are allowable over the prior art of record.

5. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Parker, Butikofer et al., Springett, Robinson et al., and Farrell all teach accumulating data from a printer and performing a calculation.
